PROFESSIONAL SUMMARY

Solution-focused Fullstack Web Developer with 8+ years of experience designing and developing scalable systems, architecting databases, and managing Linux server environments. Proven track record of delivering complex systems on schedule while upholding security and compliance standards.

Proficient in modern JavaScript frameworks (Next.js, Node.js), PHP (Laravel), database architecture (MySQL, Postgres), DevOps (Linux, Docker, Ansible), and Web3 development (Hardhat, Viem, Wagmi). I deliver clean, maintainable code that solves real business problems and collaborate effectively across teams.

PROFESSIONAL EXPERIENCE

Full-Stack Engineer, Tunga (Remote)

2020 - Present

- Led client discovery sessions across 5+ businesses (fintech, healthcare, community), collaborating with stakeholders to define technical specs and guiding the team to deliver working applications for client validation.
- Updated business deployments flow from manual Git hooks to CI/CD pipelines (GitHub Actions, Bitbucket Pipelines) and automated server provisioning with Ansible — cutting server setup from hours to under 5 minutes and build times from 10 to under 2 minutes for faster, repeatable, error-free deployments.
- Designed database schemas for high-volume transactional data powering PHP (Laravel) and Node.js applications, using indexing and query optimization to support dashboards handling 100k+ records.

Frontend Developer, NCK Tech (On-site)

2019 – 2020

- Developed responsive frontend interfaces using Next.js and Tailwind CSS for client-facing portals.
- Optimized frontend performance through lazy loading, code splitting, and image optimization, improving Lighthouse scores from 68 to 94.
- Built management dashboard for an estate client with gate access, home maintenance requests, and levies reporting.

Frontend Developer, Chenjo Limited (On-site)

2018 - 2019

- Refactored checkout page components into reusable, composable React components based on new UI designs — reducing duplication and accelerating future feature development.
- Delivering responsive UIs that improved mobile usability on the ticketing platform.

EDUCATION

Computer Science (B.Sc), University of Nigeria

2013-2017

PROJECTS

Stablecoin Payment Processor [Link](#)

- Architected hybrid payment processor with Laravel (business logic) and Node.js (blockchain layer) — handling payments, automated reconciliation and webhooks.
- Responsive guest pages and dashboards with React, Tailwind CSS and Shadcn UI.
- Automated CI/CD pipelines with GitHub Actions and server provisioning with Ansible — enabling zero-downtime deployments.

TECHNICAL SKILLS

- **Frontend** - Next.js, Tailwind CSS, Framer motion, Shadcn UI
- **Backend** - Laravel, Node.js, Redis, WebSockets, WebRTC
- **Database** - MySQL, PostgreSQL, MongoDB
- **Blockchain** - Hardhat, Viem, Wagmi
- **DevOps** - Linux, Docker, CI/CD

CORE SKILLS

- Leadership & Collaboration
- Communication
- Problem solving
- Timely Project Delivery

ADDITIONAL INFORMATION

Work Hours: Full-time availability

Attributes: Organized, Result-oriented, Reliable

Languages: English (Fluent)
